
Land & Buildings Reports

Holt

1900-1949

1917

Bad water at Holt. The Surveyor reported that he had taken another sample of water in a well at Holt, the property of the late Mr. W. Deverell. The analysis showed that there was an excess of animal matter. There had been an improvement but even now the water did not come up to the proper standard for drinking purposes. It was decided to serve an order to lay on a proper supply. **Wiltshire Times, 20 January 1917**
